

Device Modeling Service

Proplus provides the best-in-class device modeling services to the industry. The service, equipped with a state-of-the-art device characterization lab, has been serving for leading customers in the world for more than 10 years with track records.

SCOPE

- ◆ Full covering of the device modeling area
 - From test chip design, device characterization, to model extraction and validation
 - Specialized in 1/f noise characterization and reliability modeling
 - Interconnect, mismatch modeling
- ◆ Full support of model types
 - Baseband to RF models
 - All public domain models, Cadence proprietary models, macro models
 - MOSFET, BJT, SOI, TFT, HV MOS/LDMOS, etc

- ◆ Extended modeling services
 - Training, consulting and knowledge transfer
 - Modeling capability setup
 - Model co-development
- ◆ Fully equipped device characterization lab
- ◆ High quality, fast turn-around time
- ◆ Long history with track records
